
Real Estate Industry

Project Management Office (PMO)

Company Profile:

The USA based client founded in 1969 offers nationwide Real Estate services. The client is one of the largest independently owned providers of real-estate services in the country. The client helps customers to locate, finance, and insure homes in major markets across the US. One of the largest private real estate services companies in the country, Client specializes in residential property brokerage, relocation services, financing, and insurance. The Client has more than 500 company-owned or independently franchised locations in nearly 40 states and Washington, DC. They also provide commercial brokerage services. The Client's Financial Services provides financing, mortgage, and insurance products. Weichert was founded by President Jim Weichert in 1969.

Situation:

Client needed to design a solution in Office 365 (SharePoint Online) to manage different tasks status of Projects and release sites by managers and get email notifications at different stages with responsive design.

Solutions:

NGenious Solutions, Inc., offered its' technical expertise to build online site for managers and requestor users. Here, requestor can wish for a request for his manager which can be approved/rejected/keep pending by managers. If approved, request is further processed to assign a project. Project further is sub-divided into different releases. Each request is taken as a task which can be moved from project to release, release to release or release to project. Each task may have many levels of sub-tasks. Helpdesk requirements to copy tasks to projects.

Overview

Customer Profile:

The USA based client offers nationwide Real Estate services.

Industry: Real Estate

Country: USA

Technologies: SharePoint 2013 office 365 (SharePoint online)

Benefits:

- 1) Real time tracking
- 2) Better Task management
- 3) Communicates with stakeholders
- 4) Efficient Navigation for project tracking
- 5) Enhanced user interface
- 6) Cost effective solution

Benefits:

◆ **Real time tracking**

The solution provided real time tracking the status of ongoing project(s) and its associated tasks.

◆ **Better Task management**

Overall task management capabilities were enhanced. Creation of tasks and managing all project and release tasks is from single page. Easy movement of tasks from PMO to Project, Project to Project, Project to Release site and Project to PMO.

◆ **Communicates with stakeholders**

Incorporated email alerts using workflows at various stages helps in easy tracking of request status to stakeholders.

◆ **Efficient Navigation for project tracking**

Different set of views provided to Stakeholder users to get the snapshots of their designated task(s) & its associated projects.

◆ **Enhanced user interface**

Users were able to utilize the more robust SharePoint Online User Interface including responsive design support for multiple devices.

◆ **Cost effective solution**

Offshore-onshore delivery model used for project has benefited client from cost perspective as compared to onshore delivery model.
